Directory of Roads, Streets, Alleys, &c.

There are 1170 originally laid out blocks or squares, bounded by 21 avenues, and over 100 streets in the city, irrespective of the suburbs. The Capitol is nearly the centre of the city, and from it the streets are laid out at right angles, and according to our new system of numbering, are divided into four grand cardinal sections. All the streets lying northwest of the center of the Capitol have northwest attached to them; those southeast, southwest and northeast are named in the same manner. The new system of numbering is called the decimal system, and is on the principal of allowing 100 for every square. It is beneficial to the city in case of fire or tearing down of a block of buildings; it does not disarrange the numbers ahead of that square. The streets named alphabetically run east and west from North and South Capitol streets; the streets named by numerals, run north and south from East Capitol and the Mall. The avenues are laid out diagonally, as to the right-angled streets, their names will be found below. Many of the squares or blocks are so large that additional streets and alleys have been opened and named. Many of these alleys were named by the Directory men while canvassing, generally from some local cause. A glance at the past and present list of streets and alleys will show how these latter are increasing. We have added a list of all the roads in the District, which will be found very useful.

THE NEWSPAPER OF THE NATIONAL CAPITAL

The Evening Star,

WASHINGTON, D. C.

THE EVENING STAR is everywhere recognized as a leading newspaper of Washington. With two exceptions only, *it has the largest circulation of any daily paper published south of New York,* AND MORE THAN DOUBLE THAT OF ANY OTHER PAPER IN THE CITY.

Every issue of THE STAR is carefully read, not only by the citizens of Washington and adjacent cities, but by the throngs of strangers constantly visiting the National Capital on business or for pleasure, (and who constitute, in a very large degree, the wealthy and purchasing population of every section of the country,) thus making it for most purposes

THE BEST ADVERTISING MEDIUM IN THE UNITED STATES.

 Its influence as an agent of publicity has practically no limit. Seed sown in its columns not unfrequently brings forth fruit in every State and Territory in the Union.

 A Schedule of Advertising Prices (*from which there is no deviation*) sent to any address on application.

SUBSCRIPTION TERMS.

DAILY STAR,—Served by carriers in the city, 10 cents a week. By mail, 50 cents a month, or \$6.00 per year.

WEEKLY STAR,—\$2.00 per year. This is a double or eight-page sheet, containing fifty-six columns of fresh News, Literary and Agricultural matter every week, and is pronounced by competent judges *the Cheapest and Best Weekly Paper in the United States.*

 ALL MAIL SUBSCRIPTIONS MUST BE PAID IN ADVANCE. Specimen copies furnished gratis.

Address, in all cases,

J. B. MCKAY, Veterinary Surgeon

A practical Veter-
 inary Surgeon of 20
 years experience. To
 that noble animal,
 the Horse, he gives
 his entire attention
 as to treatment.

Thankful for the
 liberal patronage the
 people of the District
 have bestowed upon
 him during the last
 15 years, he solicits a
 continuance of the
 same.

Also, an Infirmary
 for Sick and Lame
 Horses and Mules.
 As there are many
 honest men cheated
 in buying horses and
 mules, it would be
 well to call at this
 establishment and
 have them examined
 carefully before pur-
 chasing. It is better
 to pay \$2 than to lose
 from \$300 to \$500.

COLIC MEDICINE

Prepared and sent to all parts of the United States. No farmer, or any others owning
 Horses or Mules, ought to be without it, as it is often required in the night time,
 or when you cannot procure a Veterinary Surgeon. Price of medicine, done up
 in bottles, 75 cents to \$1. Liniment for Sprains. Also, the best Sweating
 Blister for Splints, Spavins, &c., &c.

Letters addressed to the undersigned, at Washington, D. C., will be promptly attended to.

J. B. McKAY,

Can be found at his office, day or night, when not professionally engaged.

Charges Reasonable. Office 807 6th St., bet. H and I nws., Washington, D. C.

T. W. MURPHY, VETERINARY SHOEING FORGE,

Horses Shod up to Nature and according to Art.

623 G Street, between Sixth and Seventh,
WASHINGTON, D. C.

Horse Shoeing being a most important operation, it is necessary that all Horse Shoers should thoroughly understand the structure and diseases of the foot. The improper mode of Shoeing is often the cause of Lameness in Horses, and it frequently generates many Diseases in the Foot, all of which is actually attributable to the ignorance and want of capacity and skill on the part of the shoers. I would respectfully call the attention of the public.

T. W. MURPHY,

623 G Street, bet. Sixth and Seventh.

Where all causes of LAMENESS in the feet, such as CORNS, QUARTER CRACKS, CENTER CRACKS, NAILS IN THE FOOT, CREASE IN THE HEELS, QUITTORS, &c., &c., will be treated carefully and properly.

MISCELLANEOUS.

GOVERNMENT OF THE UNITED STATES. EXECUTIVE.

Executive Mansion.

The President's Mansion, or White House, as it is familiarly called, is on Pennsylvania avenue, between 15th and 17th sts. nw. and fronting Lafayette Square. It was erected in 1792; rebuilt after the war of 1812. It is built of freestone, and painted white. The lawns around, containing some twenty acres, drop gradually toward the Potomac river. This elegant but not imposing edifice is two stories high, 170 feet long, 86 feet deep. On the north front, upon Pennsylvania avenue, the building has a portico with four Ionic columns, under which carriages pass. A sectional colonade of six Doric pillars adorns the Potomac front. In the center of the lawn, across the avenue, on the north, is Clark Mills' bronze equestrian statue

of General Jackson, erected in January, 1853. The artist has the honor to be the first to succeed in erecting a statue representing a steed poised upon its hind feet, with no other support. It is cast of cannon taken by Jackson, and cost \$50,000. Near the President's mansion, on the west side, are the very plain buildings of the Navy and War Departments, and on the other side the Treasury Department.

The Smithsonian Institution is within the area of the New Park, west of the Capital and south of Pennsylvania avenue. The edifice is constructed of the red sandstone in the Norman Romanesque style. Its length is 450 feet, its breadth 140, and its nine towers from 75 to 150 high. The immense library, formerly in this institution, has been transferred to the Congressional Library. The national collections of natural history, geology, &c., of the United States Exploring and Surveying Expeditions are deposited in the institution. The preservation of these collections is but a part of the objects of the establishment. Through its influence a series of scientific investigations are carried on by collaborators in different parts of the country, and the results are published in a series of quarto volumes, called the "Smithsonian Contributions to Knowledge," copies of which are sent in exchange for other publications, to all the principal libraries in the world. THE LIBRARY OF CONGRESS occupies the central west front of the Central Capitol Building. The original library was commenced in 1800, but was destroyed with the Capitol in 1814, during the war with England. It was

afterwards replenished by the purchase of the library belonging to ex-President Jefferson by Congress, embracing about 7,000 volumes. In 1851 it contained 55,000 volumes, and by an accidental fire in that year the whole collection was destroyed except 20,000 volumes. It was rebuilt in 1852, when \$75,000 was appropriated in one sum to replenish the collection. The new Library Halls, three in number, are fitted up with ornamental iron cases and iron ceilings, the whole being perfectly fire-proof.

The library is recruited by regular appropriations made by Congress, which average about \$12,000 per an'm, and also by additions received by copyright, and from the Smithsonian Institution. The library of the Smithsonian Institution has now been deposited in the library of Congress, where it is secured against loss by fire. This collection is especially rich in scientific works, embracing the largest assemblage of the transactions of

L Sts., qualifies for Business or Civil Service

learned societies which exists in the country. The library of copyright books was removed here from the Patent Office in 1870, and all copyrights issued in the United States are now recorded in the books deposited in the office of the Librarian of Congress. The present number of volumes in the whole library, including law books, which are kept in a separate library under the Supreme Court, is over 250,000. This collection is very rich in history, political science, jurisprudence, and in books, pamphlets periodicals of American publication, or relating in any way to America. At

the same time, the Library is a Universal one in its range, no department of literature or science being unrepresented. The public are privileged the use of the books in the library, while members of Congress and about thirty official members of the Government only can take away books. The library is open every day, (Sundays excepted) during the session of Congress from 9 A. M. to the hour of adjournment. In the recess of Congress, it is open between the hours of 9 A. M. and 4 P. M. Librarian, Ainsworth R. Spofford.
